MOBILIDADE E DOS
TRANSPORTES, I.P.

THE PORTUGUESE SYSTEM of NATIONAL SAFETY RULES

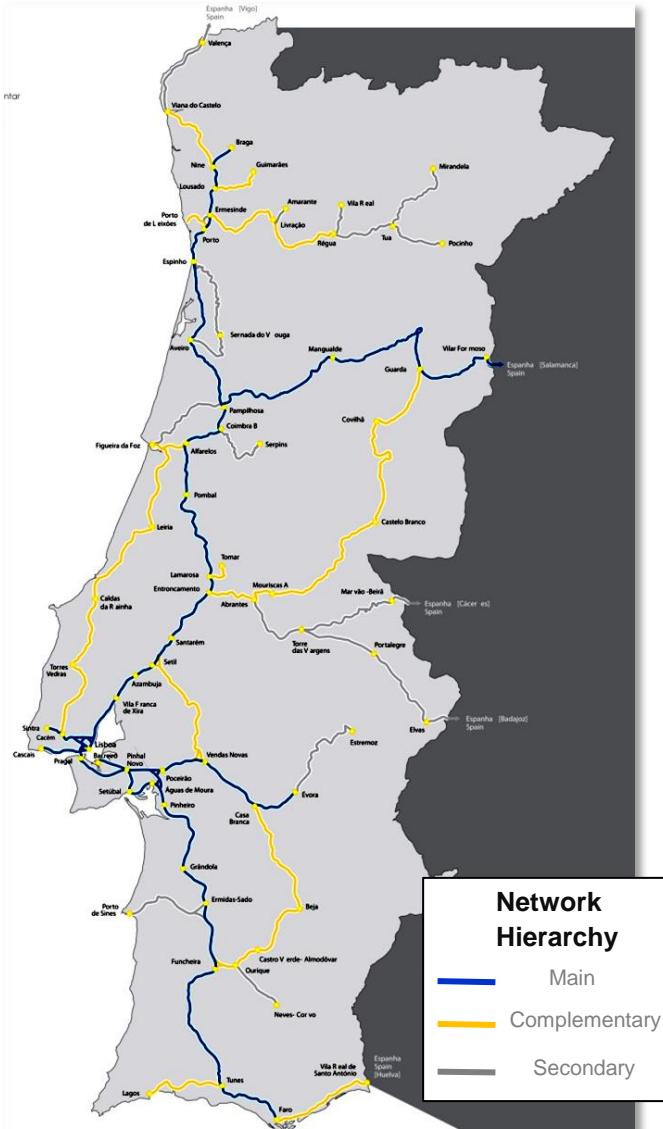

Emídio Cândido

Summary

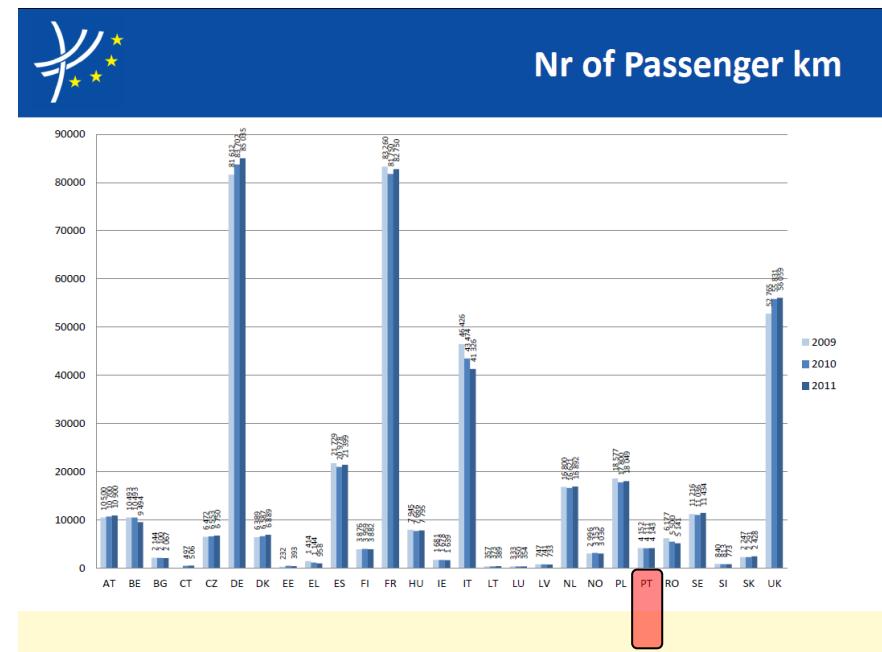

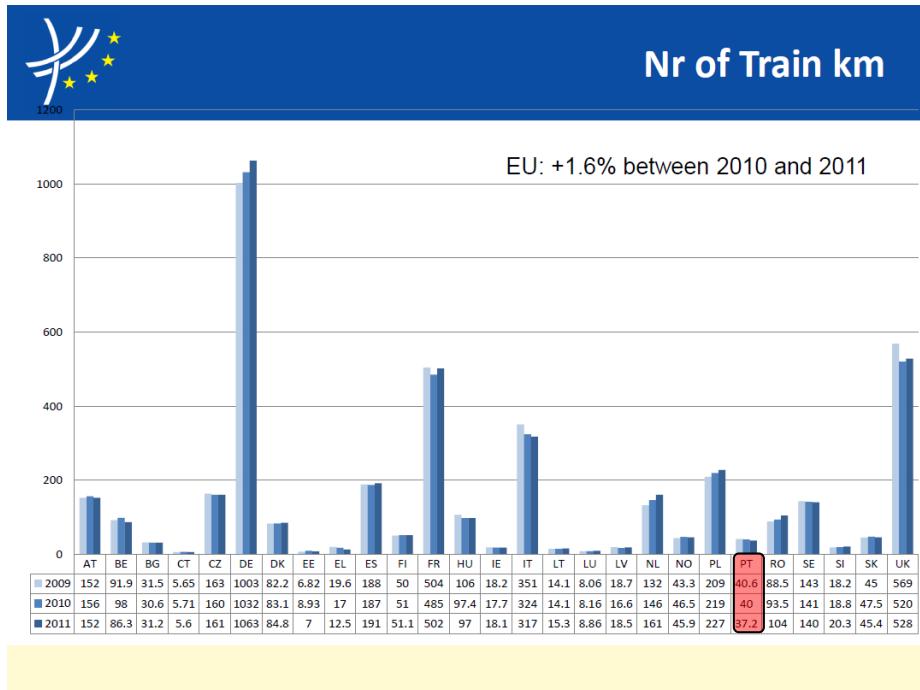

- 1. Railway transport in Portugal**
- 2. Portuguese railway sector (1996-2013)**
- 3. IMT,I.P.- The Portuguese NSA**
- 4. The national safety rule system**

1. Railway transport in Portugal – the rail network

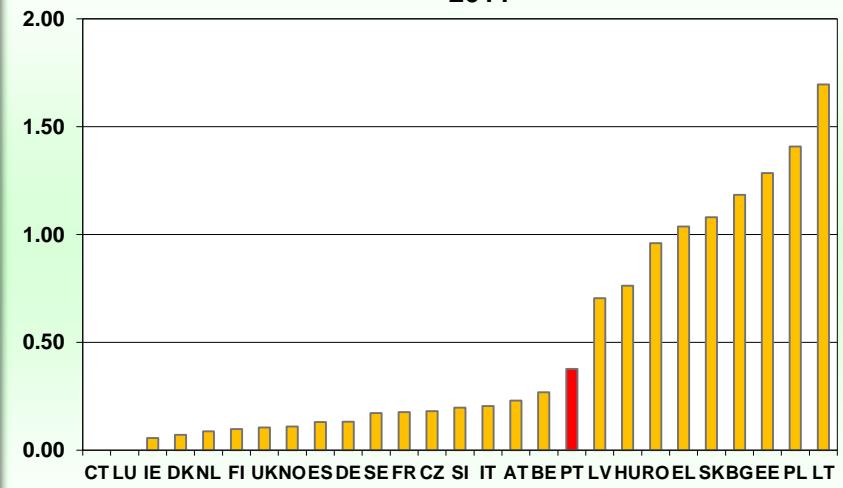

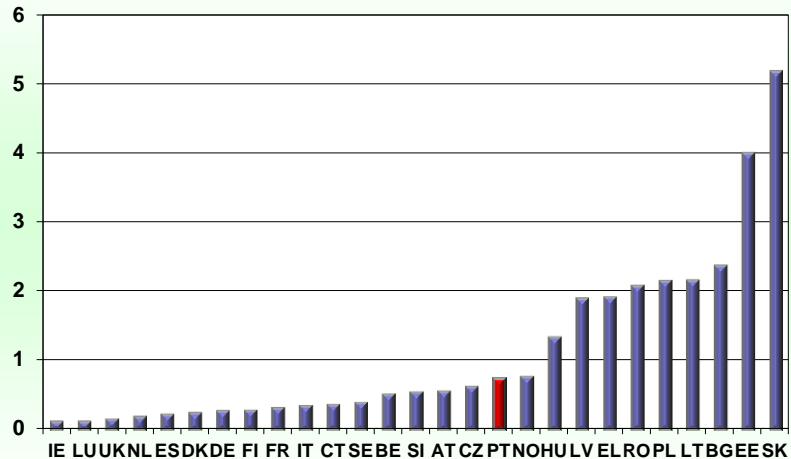

Year 2013	Data
Railway network with traffic	2544 km
Broad gauge (1668 mm)	2432 km / 95,6 %
Narrow gauge (1000 mm)	112 km / 6,8 %
Single track	1934 km / 76 %
Multiple track	610 km / 24 %
Electrification (25kV /1500 Vdc)	1630 km / 64 %
Lines with ATP (EBICAB 700)	1646 km / 65 %
Train- km with ATP	90%
Lines with radio system	1505 km / 59 %
Nº of level crossings	877 / 0,34 per km
Nº of trains per day (year 2011)	1985 Passengers 90% + Freight 10 %

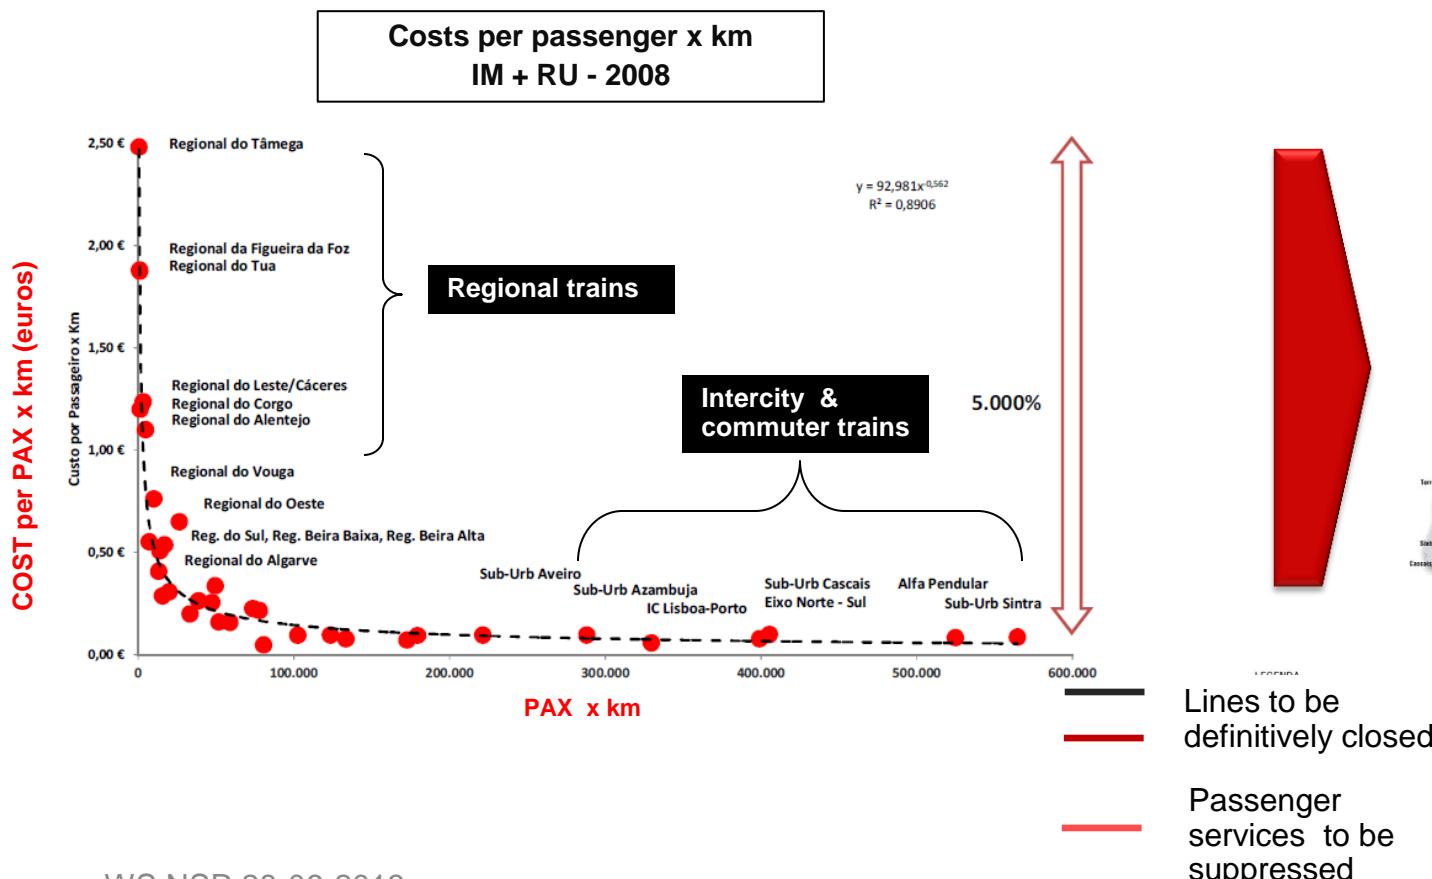

1. Railway transport in Portugal – the rail network

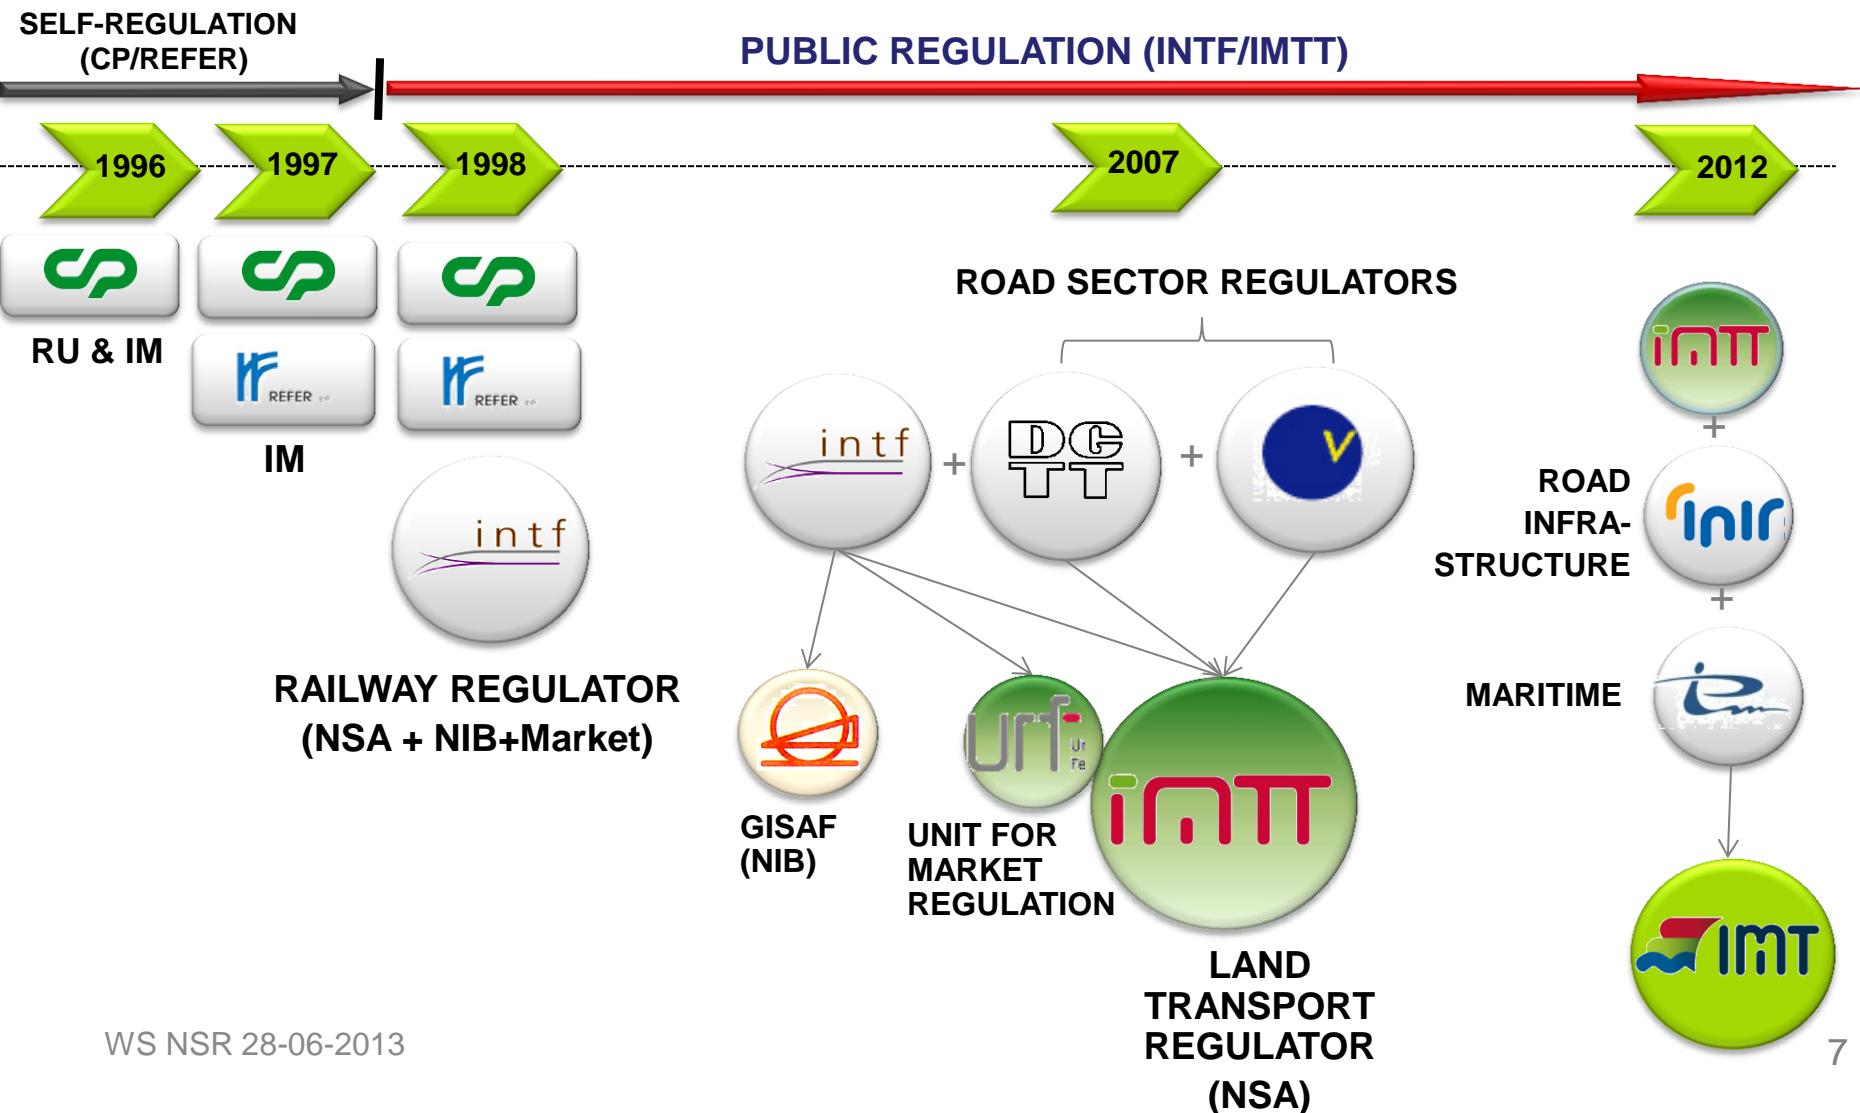

1. Railway transport in Portugal – the rail network

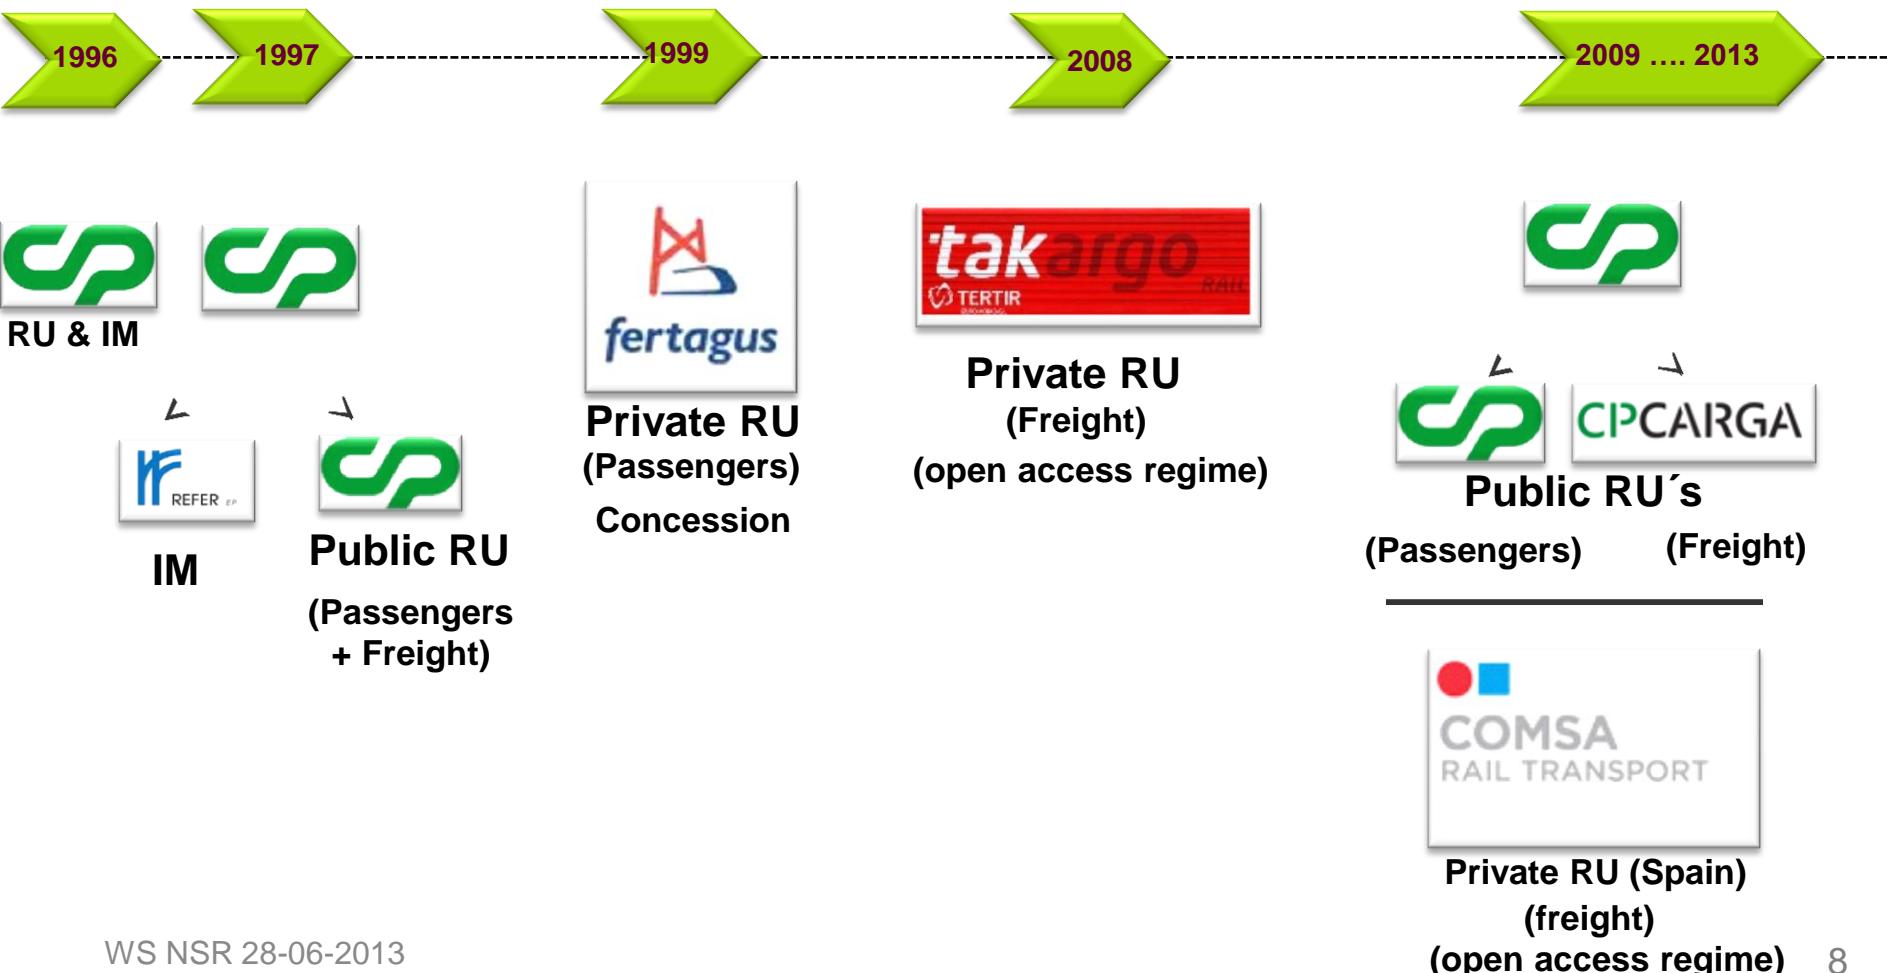

1. Railway transport in Portugal – the rail network

2. Portuguese Railway Sector (1996-2013)

2. Portuguese Railway Sector (1996-2013)

3. IMT, I.P. – The Portuguese NSA

MISSION

Regulation, supervision, coordination and planning

SCOPE

All modes of transportation, except aviation
Nationwide, except Islands (Madeira, Azores)

ORGANISATION

Subject to supervision of Ministry of Economy and Employment, but with administrative and financial autonomy
Includes a functionally independent unit for railway market regulation (URF)

3. IMT, I.P. – The Portuguese NSA

RAILWAY TASKS

- Safety : act as National Safety Authority (NSA)
- Licencing of railways undertakings
- Market regulation (URF – regulatory unit)

SAFETY TASKS

- Certification / Authorisation (RU's + IM + Drivers + ECM)
- **Publication & notification of all national safety rules**
- Supervision of all railway activities

INTEROPERABILITY TASKS

- Authorisation to put into service subsystems: RST, ENE, INF, CCS
- Management of national registers (RST & Infrastructure)
- Designation and notification of conformity assessment bodies

3. IMT, I.P. – The Portuguese NSA: Scope

**IMT, I.P. - Safety
Regulation of all guided
transport systems**

Railways

Railway
Undertakings

Infrastructure
Manager

Contractors

Rolling Stock
Maintenance
Workshops

**Integrated
Systems**

Metro

Light Rail

Mini Trains

Tramways

Cableways

Funicular
Railways

Aerial
Ropeways

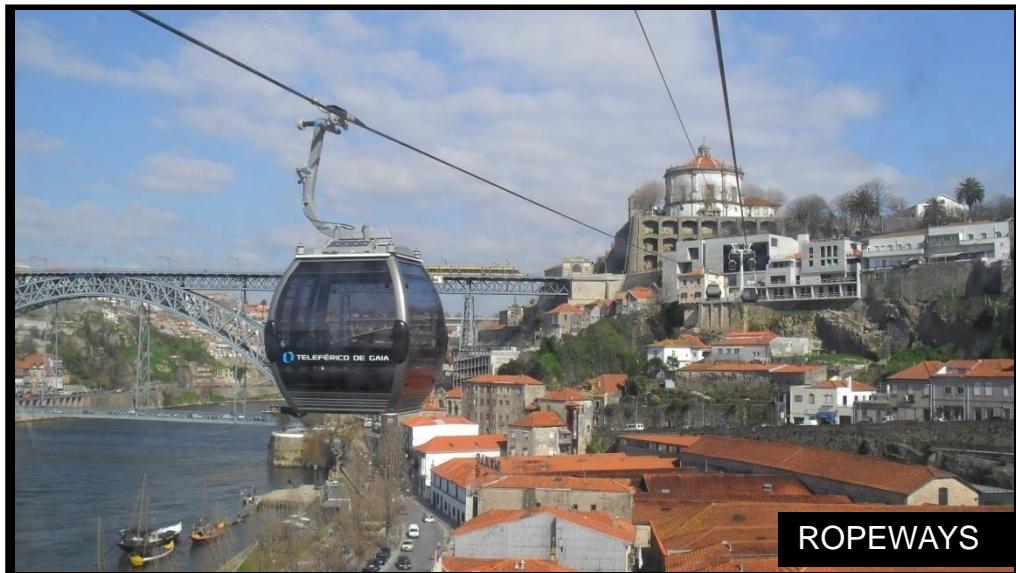

Drag lifts

RAILWAYS

INTEGRATED SYSTEMS

CABLEWAYS

4. The national safety rule system

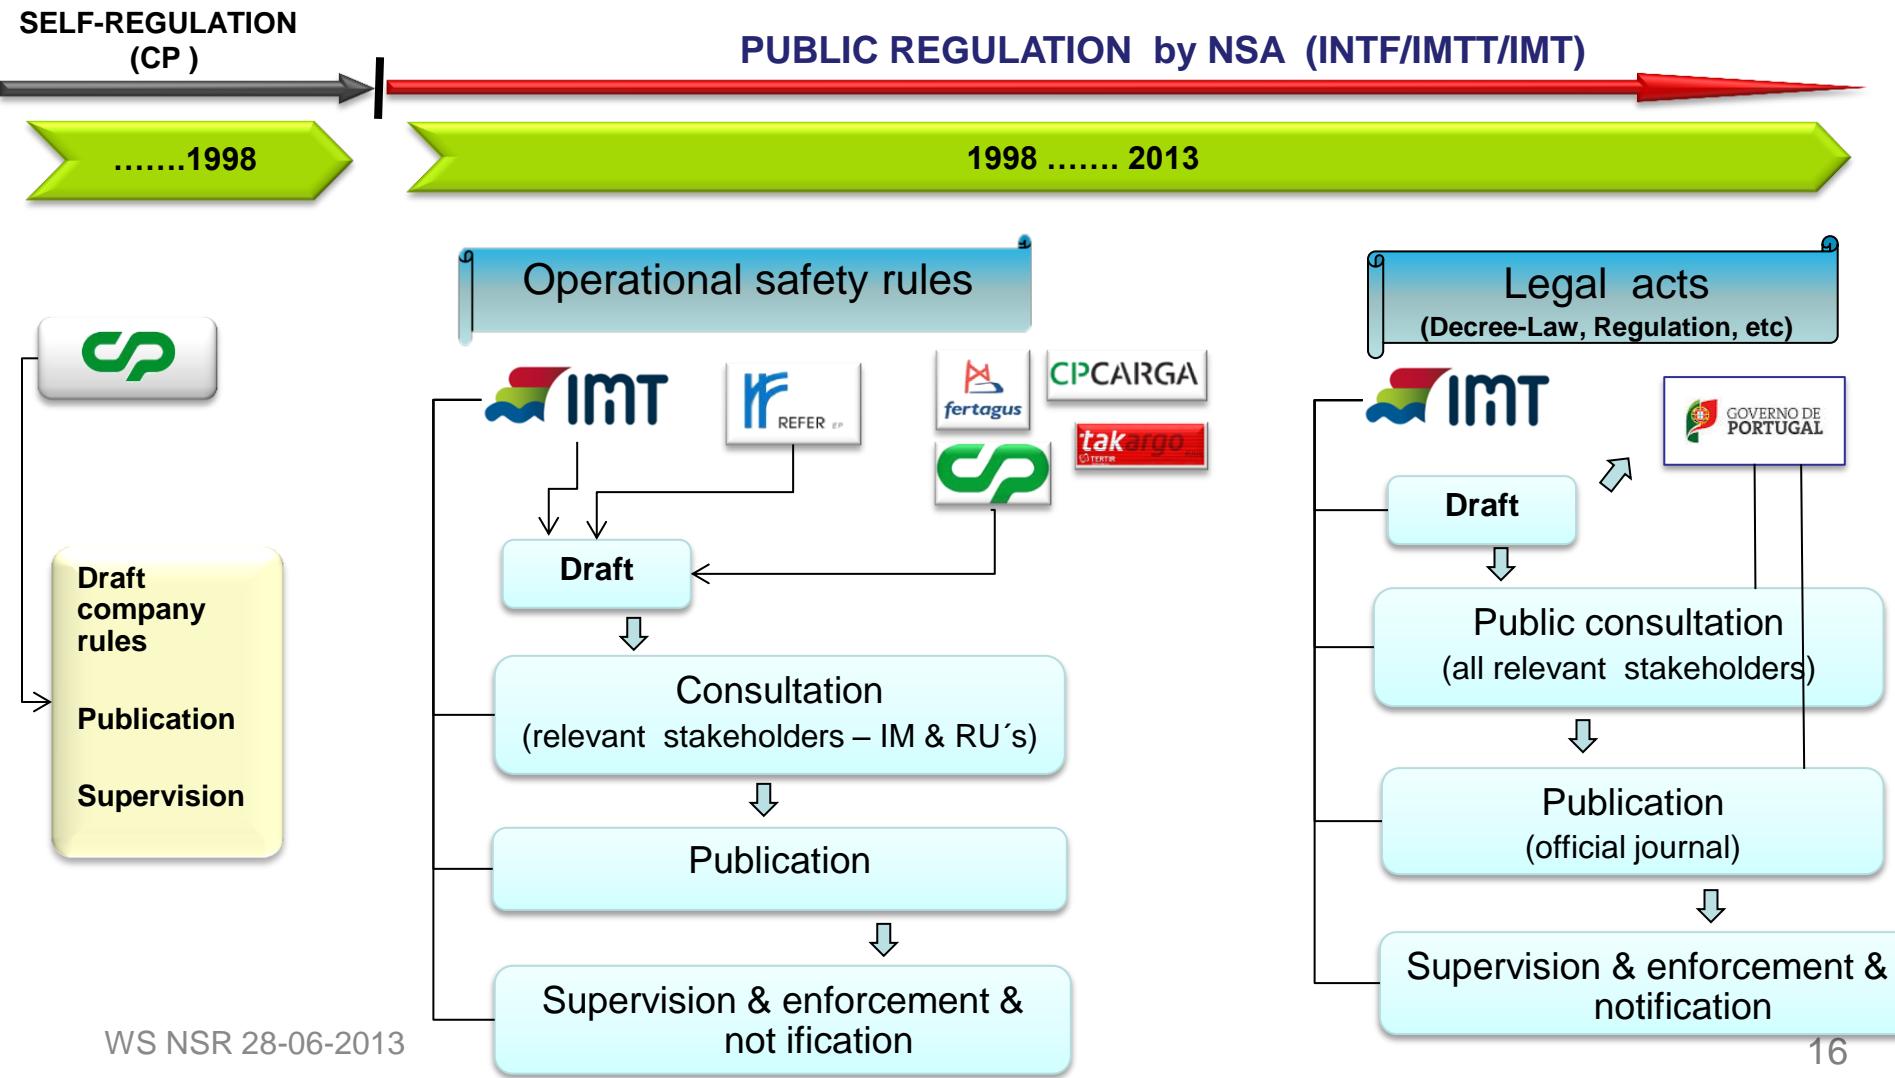

Existing safety rule system is managed since 1999 firstly based in a Memorandum Of Understanding among NSA + IM + incumbent RU, and afterwards in:

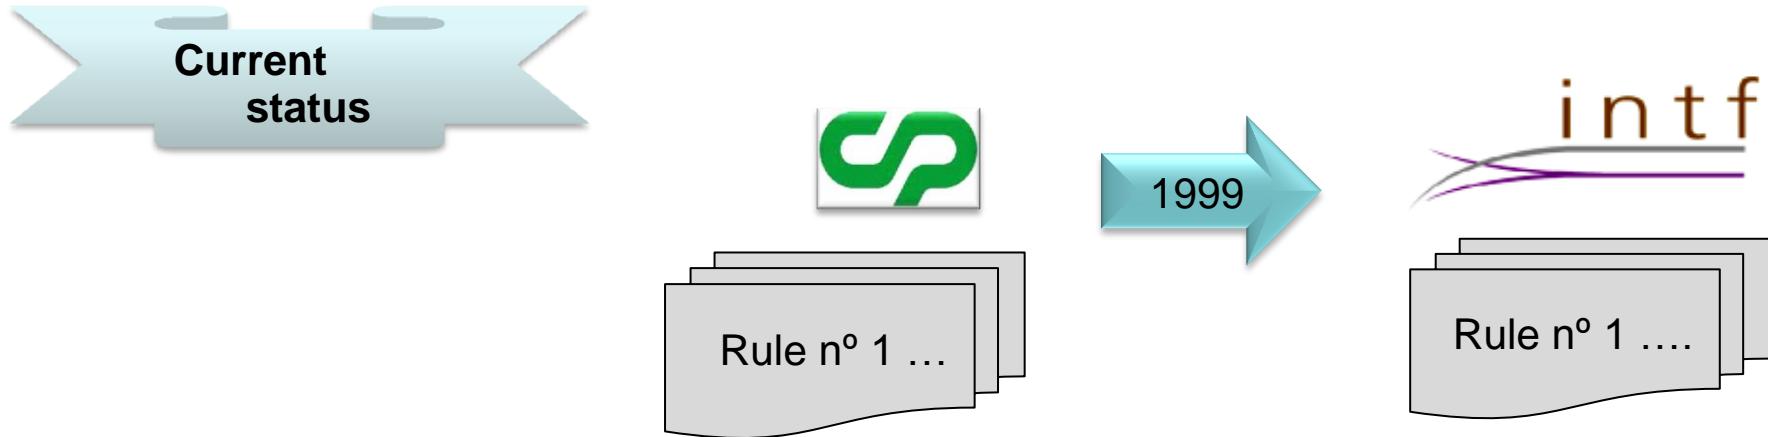

Article 66 N of Decree-law 270/2003 amended by Decree-law 231/2007 :

1. The IMT approves and publishes technical rules for safety, establishing the railway safety requirements, and ensures their implementation and application in a transparent and non-discriminatory way.
2. In exercising the competence provided in the preceding paragraph, the IMT takes into account the need to conform the technical rules of safety with CSM and CST defined at EU level
3. Safety rules are published in the official journal

4. The national safety rule system

4. The national safety rule system

- ✓ The complete set of legacy company rules published by the incumbent monopoly company (CP) was transferred in 1999 to be managed by NSA
- ✓ All new and amended safety rules are published and enforced by NSA
→ There aren't indirect safety rules
- ✓ Transparent participation and consultation process of interested stakeholders in the drafting and approval of new or amended rules
- ✓ All safety rules are available to public (on request in the IMT, I.P website)

4. The national safety rule system

- ✓ Safety rule system is rather complex and difficult to manage and understand by users
- ✓ Lack of stability due to frequent amendments and updates
- ✓ In several aspects obsolete due to the fact that was drafted based in the old structure and hierarchy of the incumbent company
- ✓ Increasing shortage of staff in NSA to continue to manage the system like it runs today
- ✓ Several attempts to review and update the system since 1998, last one during two years in 2003-2005, were not well succeeded

4. The national safety rule system

Planned Developments in NSR

How ?

All existing rules listed in IET nº 2 will be reviewed according RMT

Definition of responsibilities to manage NSR and non-NSR

Review and Update the content of NSR

Notification of reviewed NSR in Notif-IT

Who ?

Coordination and leadership by IMT

Active participation by relevant stakeholders (working group / task force)

Experts in railway safety and operations and legal affairs

When ?

First draft classification of NSR – late 2013

Discussion and agreement on classification of NSR and responsibilities – 1st half 2014

Review and Update the content of NSR – from 2nd half 2014 to end 2015

Thank you for your attention!
